

Make a beeline for the company's just-unveiled Mart showroom, with a pastel-perfect scheme by Ghislaine Viñas that embodies Nordic cool. The New York designer used color blocking to strategic effect, with bold strokes of mid-century-esque green, yellow, and citron forming a stagelike backdrop for progressive workplace products. Makers spotlighted in the showroom include Blå Station, Götessons, Skandiform, Materia, and Nordgröna—brands you don't want to miss!

“For me, the ocean is nirvana,” says Ghislaine Viñas. Now, the designer comes ashore with her first fabric line for HBF Textiles, replete with nautical inspirations. Called Curious Crowd and developed with HBF’s VP of design and creative director Mary Jo Miller, the six patterns in vivid colors have playful names like **Captain Bubble**, a woven jacquard in cotton and rayon. An entire school of jellyfish informed **Madam Dottie**, a fine-denier solution-dyed nylon with matte polyester. Entangled tentacles mark **Sir Stripe-A-Lot**, a take on the cabana stripe in Sunbrella acrylic and solution-dyed polyester. Mollusks wade into the mix in **Sister Solid**, a bumpy blend of polyester and solution-dyed acrylic, and **Ms. Quilty**, rendered in Sunbrella acrylic.
